5 *Counsel for Plaintiff and  
the Putative Class*

6 UNITED STATES DISTRICT COURT  
7 CENTRAL DISTRICT OF CALIFORNIA

8  
9 TERESA TURNER, individually and  
on behalf of all others similarly  
situated,

10 Plaintiff,

11 V.

12 NATIONAL NOTARY  
13 ASSOCIATION,

14 Defendant.

Case No. 2:25-cv-334

**CLASS ACTION COMPLAINT**

**DEMAND FOR JURY TRIAL**

15 Plaintiff Teresa Turner, individually and on behalf of all others similarly  
16 situated, makes the following allegations pursuant to the investigation of counsel and  
17 based upon information and belief, except as to allegations pertaining specifically to  
18 herself or her counsel, which are based on personal knowledge.

19 **A. NATURE OF THE CASE**

20 1. Plaintiff brings this action to redress Defendant's practice of selling,  
21 renting, transmitting, and/or otherwise disclosing to Meta, records containing the

1 personal information of each of its customers, along with detailed information  
2 revealing the titles and subject matter of the videos and other audiovisual materials  
3 purchased by each customer in violation of the Video Privacy Protection Act, 18 U.S.C.  
4 § 2710 et seq. (“VPPA”).

5       2. Over the past two years, Defendant has systematically transmitted (and  
6 continue to transmit today) its customers’ personally identifying video viewing  
7 information to third parties, such as Meta Platforms, Inc. (“Meta”). The programming  
8 code for Meta is called the “Meta Pixel,” which Defendant chose to install on the  
9 [www.nationalnotary.org](http://www.nationalnotary.org) website.

10       3. The information Defendant disclosed (and continues to disclose) to Meta  
11 via the Meta Pixel includes the customer’s Facebook ID (“FID”) and the specific title  
12 of prerecorded videos that each of its customers purchased on Defendant’s Website.  
13 An FID is a unique sequence of numbers linked to a specific Meta profile. A Meta  
14 profile, in turn, identifies by name the specific person to whom the profile belongs (and  
15 also contains other personally identifying information about the person). Entering  
16 “Facebook.com/[FID]” into a web browser returns the Meta profile of the person to  
17 whom the FID corresponds. Thus, the FID identifies a person more precisely than a  
18 name, as numerous persons may share the same name, but each person’s Facebook  
19 profile (and associated FID) uniquely identifies one and only one person. In the  
20 simplest terms, the Meta Pixel installed by Defendant captures and discloses to Meta

1 information that reveals a particular person purchased a specific title of a prerecorded  
2 video on Defendant's Website (hereinafter, "Private Video Information").

3 4. Defendant disclosed and continue to disclose its customers' Private Video  
4 Information to Meta without asking for, let alone obtaining, their consent to these  
5 practices.

6 5. The VPPA clearly prohibits what Defendant has done. Subsection (b)(1)  
7 of the VPPA provides that, absent the consumer's prior informed, written consent, any  
8 "video tape service provider who knowingly discloses, to any person, personally  
9 identifiable information concerning any consumer of such provider shall be liable to  
10 the aggrieved person for," 18 U.S.C. § 2710(b)(1), damages in the amount of  
11 \$2,500.00, *see id.* § 2710(c).

12 6. Accordingly, on behalf of herself and the putative Class members defined  
13 below, Plaintiff brings this Class Action Complaint against Defendant for intentionally  
14 and unlawfully disclosing her and Putative Class members' Private Video Information  
15 to Meta.

## 16 **B. PARTIES**

### 17 **I. Plaintiff Teresa Turner**

18 7. Plaintiff is, and at all times relevant hereto was, a citizen and resident of  
19 San Luis Obispo County, California.

20 8. Plaintiff is, and at all times relevant hereto was, a user of Meta.

1           9. Plaintiff is a consumer of the video products and services offered on  
2 Defendant's [www.nationalnotary.org](http://www.nationalnotary.org) website. Including on or about August 2024,  
3 Plaintiff purchased prerecorded video material from Defendant's  
4 [www.nationalnotary.org](http://www.nationalnotary.org) website by requesting and paying for such material, providing  
5 her name, email address, and home address for delivery of such material. Defendant  
6 completed the sales of goods to Plaintiff by shipping or delivering the prerecorded  
7 video material she purchased to the address she provided in her order. Accordingly,  
8 Plaintiff requested or obtained, and is therefore a consumer of, prerecorded video  
9 material sold by Defendant on its website.

10           10. At all times relevant hereto, including when requesting or obtaining  
11 prerecorded video material from Defendant's website, Plaintiff had a Meta account, a  
12 Meta profile displaying her name and picture, and an FID associated with such profile.

13           11. Plaintiff has never consented, agreed, authorized, or otherwise permitted  
14 Defendant to disclose her Private Video Information to Meta. In fact, Defendant has  
15 never even provided Plaintiff with written notice of its practices of disclosing its  
16 customers' Private Video Information to third parties such as Meta.

17           12. Prior to and at the time she purchased prerecorded video material from  
18 Defendant, Defendant did not notify Plaintiff that it would disclose the Private Video  
19 Information of its customers generally or that of Plaintiff in particular, and Plaintiff has  
20 never consented, agreed, authorized, or otherwise permitted Defendant to disclose her

1 Private Video Information to third parties. Plaintiff has never been provided any  
2 written notice that Defendant discloses its customers' Private Video Information or any  
3 means of opting out of such disclosures of her Private Video Information.

4 13. Because Defendant disclosed Plaintiff's Private Video Information  
5 (including her FID, unique identifiers, and her request or purchase of prerecorded video  
6 material from Defendant's website) to third parties during the applicable statutory  
7 period, Defendant violated Plaintiff's rights under the VPPA and invaded her  
8 statutorily conferred interest in keeping such information (which bears on her personal  
9 affairs and concerns) private.

## 10 **II. Defendant**

11 14. Defendant National Notary Association is a not-for-profit corporation  
12 organized under the laws of California, with its headquarters at 9350 De Soto Ave.,  
13 Chatsworth, California 91311. Defendant is the largest and oldest organization in the  
14 United States serving notaries and training persons to be notaries through certifications,  
15 trainings, seminars, conferences, and printed and online educational materials that  
16 accompany these programs.

## 17 **C. JURISDICTION AND VENUE**

18 15. The Court has subject-matter jurisdiction over this civil action pursuant to  
19 28 U.S.C. § 1331 and 18 U.S.C. § 2710.

1           16. Personal jurisdiction and venue are proper because Defendant maintains  
2 its headquarters and principal place of business in Los Angeles, California, within this  
3 judicial District.

4                                   **VIDEO PRIVACY PROTECTION ACT**

5           17. The VPPA prohibits companies (like Defendant) from knowingly  
6 disclosing to third parties (like Meta) information that personally identifies consumers  
7 (like Plaintiff) as having requested or obtained specific video(s) or other audio-visual  
8 materials from its Website.

9           18. Specifically, subject to certain exceptions that do not apply here, the  
10 VPPA prohibits “a video tape service provider” from “knowingly disclos[ing], to any  
11 person, personally identifiable information concerning any consumer of such  
12 provider[.]” 18 U.S.C. § 2710(b)(1). The statute defines a “video tape service  
13 provider” as “any person, engaged in the business . . . of rental, sale, or delivery of  
14 prerecorded video cassette tapes or similar audio visual materials,” 18 U.S.C. §  
15 2710(a)(4). It defines a “consumer” as “a renter, purchaser, or subscriber of goods or  
16 services from a video tape service provider.” 18 U.S.C. § 2710(a)(1). “[P]ersonally  
17 identifiable information’ includes information which identifies a person as having  
18 requested or obtained specific video materials or services from a video tape service  
19 provider.” 18 U.S.C. § 2710(a)(3).

1           19. Leading up to the VPPA’s enactment in 1988, members of the United  
2 States Senate warned that “[e]very day Americans are forced to provide to businesses  
3 and others personal information without having any control over where that  
4 information goes.” *Id.* Senators at the time were particularly troubled by disclosures  
5 of records that reveal consumers’ purchases and rentals of videos and other audiovisual  
6 materials because such records offer “a window into our loves, likes, and dislikes,”  
7 such that “the trail of information generated by every transaction that is now recorded  
8 and stored in sophisticated record-keeping systems is a new, more subtle and pervasive  
9 form of surveillance.” S. Rep. No. 100-599 at 7-8 (1988) (statements of Sens. Simon  
10 and Leahy, respectively).

11           20. Thus, in proposing the Video and Library Privacy Protection Act (which  
12 later became the VPPA), Senator Patrick J. Leahy (the senior Senator from Vermont  
13 from 1975 to 2023) sought to codify, as a matter of law, that “our right to privacy  
14 protects the choice of movies that we watch with our family in our own homes.” 134  
15 Cong. Rec. S5399 (May 10, 1988). As Senator Leahy explained at the time, the  
16 personal nature of such information, and the need to protect it from disclosure, is the  
17 *raison d’être* of the statute: “These activities are at the core of any definition of  
18 personhood. They reveal our likes and dislikes, our interests and our whims. They say  
19 a great deal about our dreams and ambitions, our fears and our hopes. They reflect our  
20 individuality, and they describe us as people.” *Id.*

1           21. While these statements rang true in 1988 when the act was passed, the  
2 importance of legislation like the VPPA in the modern era of data mining is more  
3 pronounced than ever before. During a more recent Senate Judiciary Committee  
4 meeting, “The Video Privacy Protection Act: Protecting Viewer Privacy in the 21<sup>st</sup>  
5 Century,” Senator Leahy emphasized the point by stating: “While it is true that  
6 technology has changed over the years, we must stay faithful to our fundamental right  
7 to privacy and freedom. Today, social networking, video streaming, the ‘cloud,’ mobile  
8 apps and other new technologies have revolutionized the availability of Americans’  
9 information.”<sup>1</sup>

10           22. Former Senator Al Franken may have said it best: “If someone wants to  
11 share what they watch, I want them to be able to do so . . . But I want to make sure that  
12 consumers have the right to easily control who finds out what they watch—and who  
13 doesn’t. The Video Privacy Protection Act guarantees them that right.”<sup>2</sup>

14           23. In this case, however, Defendant deprived Plaintiff and numerous other  
15 similarly situated persons of that right by systematically (and surreptitiously)

disclosing their Private Video Information to Meta, without providing notice to (let alone obtaining consent from) any of them, as explained in detail below.

## BACKGROUND FACTS

### I. Consumers' Personal Information Has Real Market Value

24. In 2001, Federal Trade Commission ("FTC") Commissioner Orson Swindle remarked that "the digital revolution . . . has given an enormous capacity to the acts of collecting and transmitting and flowing of information, unlike anything we've ever seen in our lifetimes . . . [and] individuals are concerned about being defined by the existing data on themselves."<sup>3</sup>

25. Over two decades later, Commissioner Swindle's comments ring truer than ever, as consumer data feeds an information marketplace that supports a 26 billion dollar per year online advertising industry in the United States.<sup>4</sup>

26. The FTC has also recognized that consumer data possesses inherent monetary value within the new information marketplace and publicly stated that:

---

<sup>3</sup> Transcript, *The Information Marketplace* (Mar. 13, 2001), at 8-11, available at [https://www.ftc.gov/sites/default/files/documents/public\\_events/information-marketplace-merging-and-exchanging-consumer-data/transcript.pdf](https://www.ftc.gov/sites/default/files/documents/public_events/information-marketplace-merging-and-exchanging-consumer-data/transcript.pdf).

<sup>4</sup> See Julia Angwin and Emily Steel, *Web's Hot New Commodity: Privacy*, Wall Street Journal (Feb. 28, 2011), available at <https://www.wsj.com/articles/SB10001424052748703529004576160764037920274>.

1 Most consumers cannot begin to comprehend the types and amount of  
 2 information collected by businesses, or why their information may be commercially  
 3 valuable. Data is currency. The larger the data set, the greater potential for analysis –  
 4 and profit.<sup>5</sup>

5 27. In fact, an entire industry exists while companies known as data  
 6 aggregators purchase, trade, and collect massive databases of information about  
 7 consumers. Data aggregators then profit by selling this “extraordinarily intrusive”  
 8 information in an open and largely unregulated market.<sup>6</sup>

9 28. The scope of data aggregators’ knowledge about consumers is immense:  
 10 “If you are an American adult, the odds are that [they] know[] things like your age,  
 11 race, sex, weight, height, marital status, education level, politics, buying habits,  
 12 household health worries, vacation dreams—and on and on.”<sup>7</sup>

13

18 <sup>7</sup> N. Singer, *You for Sale: Mapping, and Sharing, the Consumer Genome*, N.Y. Times  
 19 (June 16, 2012), available at  
 20 <https://www.nytimes.com/2012/06/17/technology/acxiom-the-quiet-giant-of-consumer-database-marketing.html#:~:text=It's%20called%20the%20Acxiom%20Corporation,to%20know%20much%20C%20much%20more>.

29. Further, “[a]s use of the Internet has grown, the data broker industry has already evolved to take advantage of the increasingly specific pieces of information about consumers that are now available.”<sup>8</sup>

30. Recognizing the severe threat the data mining industry poses to consumers’ privacy, on July 25, 2012, the co-chairmen of the Congressional Bipartisan Privacy Caucus sent a letter to nine major data brokerage companies seeking information on how those companies collect, store, and sell their massive collections of consumer data, stating in pertinent part:

By combining data from numerous offline and online sources, data brokers have developed hidden dossiers on every U.S. consumer. This large[-]scale aggregation of the personal information of hundreds of millions of American citizens raises a number of serious privacy concerns.<sup>9</sup>

31. Data aggregation is especially troublesome when consumer information is sold to direct-mail advertisers. In addition to causing waste and inconvenience, direct-mail advertisers often use consumer information to lure unsuspecting consumers

---

<sup>8</sup> Letter from Sen. J. Rockefeller IV, Sen. Cmtee. On Commerce, Science, and Transportation, to S. Howe, Chief Executive Officer, Acxiom (Oct. 9, 2012) available at <https://www.commerce.senate.gov/services/files/3bb94703-5ac8-4157-a97b-%20a658c3c3061c>.

<sup>9</sup> See *Bipartisan Group of Lawmakers Query Data Brokers About Practices Involving Consumers’ Personal Information*, Website of Sen. Markey (July 24, 2012), available at <https://www.markey.senate.gov/news/press-releases/bipartisan-group-of-lawmakers-query-data-brokers-about-practices-involving-consumers-personal-information>.

1 into various scams, including fraudulent sweepstakes, charities, and buying clubs.  
2 Thus, when companies like Defendant share information with data aggregators, data  
3 cooperatives, and direct-mail advertisers, they contribute to the “[v]ast databases” of  
4 consumer data that are often “sold to thieves by large publicly traded companies,”  
5 which “put[s] almost anyone within the reach of fraudulent telemarketers” and other  
6 criminals.<sup>10</sup>

7 32. Disclosures like Defendant’s are particularly dangerous to the elderly.  
8 “Older Americans are perfect telemarketing customers, analysts say, because they are  
9 often at home, rely on delivery services, and are lonely for the companionship that  
10 telephone callers provide.”<sup>11</sup>

11 33. The FTC notes that “[t]he elderly often are the deliberate targets of  
12 fraudulent telemarketers who take advantage of the fact that many older people have  
13 cash reserves or other assets to spend on seemingly attractive offers.”<sup>12</sup>

14 34. Indeed, an entire black market exists while the personal information of  
15 vulnerable elderly Americans is exchanged. Thus, information disclosures like  
16

---

17 <sup>10</sup> See Charles Duhigg, *Bilking the Elderly, with a Corporate Assist*, N.Y. Times (May  
18 20, 2007), available at <https://www.nytimes.com/2007/05/20/business/20tele.html>.

19 <sup>11</sup> *Id.*

20 <sup>12</sup> Prepared Statement of the FTC on “Fraud Against Seniors” before the Special  
21 Committee on Aging, United States Senate (August 10, 2000).

1 Defendant's are particularly troublesome because of their cascading nature: "Once  
2 marked as receptive to [a specific] type of spam, a consumer is often bombarded with  
3 similar fraudulent offers from a host of scam artists."<sup>13</sup>

4 35. Defendant is not alone in violating its customers' statutory rights and  
5 jeopardizing their well-being in exchange for increased revenue: disclosing customer  
6 and subscriber information to data aggregators, data appenders, data cooperatives,  
7 direct marketers, and other third parties has become a widespread practice.  
8 Unfortunately for consumers, however, this growth has come at the expense of their  
9 most basic privacy rights.

## 10 **II. Consumers Place Monetary Value on Their Privacy and Consider** 11 **Privacy Practices When Making Purchases**

12 36. As the data aggregation industry has grown, so has consumer concerns  
13 regarding personal information.

14 37. A survey conducted by Harris Interactive on behalf of TRUSTe, Inc.  
15 showed that 89 percent of consumers polled avoid doing business with companies who  
16 they believe do protect their privacy online.<sup>14</sup> As a result, 81 percent of smartphone

---

17 <sup>13</sup> *Id.*

18 <sup>14</sup> See 2014 TRUSTe US Consumer Confidence Privacy Report, TRUSTe,  
19 [http://www.theagitator.net/wp-](http://www.theagitator.net/wp-content/uploads/012714_ConsumerConfidenceReport_US1.pdf)  
20 [content/uploads/012714\\_ConsumerConfidenceReport\\_US1.pdf](http://www.theagitator.net/wp-content/uploads/012714_ConsumerConfidenceReport_US1.pdf).

1 users polled said that they avoid using smartphone apps that they don't believe protect  
2 their privacy online.<sup>15</sup>

3 38. Thus, as consumer privacy concerns grow, consumers increasingly  
4 incorporate privacy concerns and values into their purchasing decisions, and  
5 companies viewed as having weaker privacy protections are forced to offer greater  
6 value elsewhere (through better quality and/or lower prices) than their privacy-  
7 protective competitors. In fact, consumers' personal information has become such a  
8 valuable commodity that companies are beginning to offer individuals the opportunity  
9 to sell their personal information themselves.<sup>16</sup>

10 39. These companies' business models capitalize on a fundamental tenet  
11 underlying the personal information marketplace: consumers recognize the economic  
12 value of their private data. Research shows that consumers are willing to pay a  
13 premium to purchase services from companies that adhere to more stringent policies  
14 of protecting their personal data.<sup>17</sup>

---

15 <sup>15</sup> *Id.*

16 <sup>16</sup> See Joshua Brustein, *Start-Ups Seek to Help Users Put a Price on Their Personal*  
17 *Data*,  
18 N.Y. Times (Feb. 12, 2012), available at  
19 <https://www.nytimes.com/2012/02/13/technology/start-ups-aim-to-help-users-put-a-price-on-their-personal-data.html>.

20 <sup>17</sup> See Tsai, Cranor, Acquisti, and Egelman, *The Effect of Online Privacy Information*  
21 *on Purchasing Behavior*, 22(2) Information Systems Research 254, 254 (2011); see  
also European Network and Information Security Agency, *Study on Monetizing Privacy*

1           40. Thus, in today's digital economy, individuals and businesses alike place  
 2 a real, quantifiable value on consumer data and corresponding privacy rights.<sup>18</sup> As  
 3 such, where a business offers customers a product or service that includes statutorily  
 4 guaranteed privacy protections, yet fails to honor these guarantees, the customer  
 5 receives a product or service of less value than the product or service paid for.

6           **III. Defendant Use the Meta Pixel to Systematically Disclose its customers'**  
 7           **Private Video Information to Meta**

8           41. As alleged below, when a consumer requests or obtains a particular  
 9 prerecorded video on Defendant's Website, the Meta Pixel technology that Defendant  
 10 intentionally installed on its Website transmits (1) the unencrypted FID for each  
 11 purchaser; (2) detailed information revealing the titles and subject matter of the  
 12 prerecorded videos requested or obtained by each of its purchasers; and (3) the URL  
 13 where such videos are available for purchase, without the consumer's consent and in  
 14 clear violation of the VPPA.

15

 18 (Feb. 27, 2012), available at <https://www.enisa.europa.eu/publications/monetising-privacy>.

19 <sup>18</sup> See Hann, et al., *The Value of Online Information Privacy: An Empirical*  
 20 *Investigation* (Oct. 2003) at 2, available at <https://www.comp.nus.edu.sg/~ipng/research/privacy.pdf>.

1           **A.     The Meta Pixel**

2           42.    On February 4, 2004, Mark Zuckerberg and others launched Facebook,  
3 now known as “Meta”.<sup>19</sup> Meta is now the world’s largest social media platform. To  
4 create a Meta account, a person must provide, *inter alia*, his or her first and last name,  
5 birth date, gender, and phone number or email address.

6           43.    The Meta Pixel, first introduced in 2013 as the “Facebook Pixel,” is a  
7 unique string of code that companies can embed on their websites to monitor and track  
8 the actions taken by visitors to their websites and to report them back to Meta. This  
9 allows companies like Defendant to build detailed profiles about its customers and to  
10 serve them with highly targeted advertising.

11          44.    Additionally, the Meta Pixel installed on a company’s website allows  
12 Meta to “match [] website visitors to their respective Facebook User accounts.”<sup>20</sup> This  
13 is because Meta has assigned to each of its users an “FID” number – a unique and  
14 persistent identifier that allows anyone to look up the user’s unique Meta profile and  
15 thus identify the user by name<sup>21</sup> – and because each transmission of information made  
16  
17

---

18          <sup>19</sup> See Facebook, “Company Info,” available at <https://about.fb.com/company-info/>.

19          <sup>20</sup> Meta, “Get Started – Meta Pixel,” available at  
<https://developers.facebook.com/docs/meta-pixel/get-started/>.

20          <sup>21</sup> For example, Mark Zuckerberg’s FID is reportedly the number “4,” so logging into  
21 Facebook and typing [www.facebook.com/4](http://www.facebook.com/4) in the web browser retrieves Mark

1 from a company's website to Meta via the Meta Pixel is accompanied by, *inter alia*,  
 2 the FID of the website's visitor.

3 45. As Meta's developer's guide explains, installing the Meta Pixel on a  
 4 website allows Meta to track actions that users with Meta accounts take on the site.  
 5 Meta states that "Examples of [these] actions include adding an item to their shopping  
 6 cart or making a purchase."<sup>22</sup>

7 46. Meta's Business Tools Terms govern the use of Meta's Business Tools,  
 8 including the Meta Pixel.<sup>23</sup>

9 47. Meta's Business Tools Terms state that website operators may use Meta's  
 10 Business Tools, including the Meta Pixel, to transmit the "Contact Information" and  
 11 "Event Data" of their website's visitors to Meta.

12 48. Meta's Business Tools Terms define "Contact Information" as  
 13 "information that personally identifies individuals, such as names, email addresses, and  
 14 phone numbers . . . ."<sup>24</sup>

15  
 16 \_\_\_\_\_  
 16 Zuckerberg's Facebook page: [www.facebook.com/zuck](https://www.facebook.com/zuck), and all of the additional  
 17 personally identifiable information contained therein.

18 <sup>22</sup> Meta, "About Meta Pixel," available at  
 18 <https://www.facebook.com/business/help/742478679120153?id=1205376682832142>.

19 <sup>23</sup> Meta, "Meta Business Tools Terms," available at  
 19 [https://www.facebook.com/legal/technology\\_terms](https://www.facebook.com/legal/technology_terms).

20 <sup>24</sup> *Id.*

1           49. Meta’s Business Tools Terms state: “You instruct us to process the  
2 Contact Information solely to match the Contact Information against user IDs [e.g.,  
3 FIDs] (“Matched User IDs”), as well as to combine those user IDs with corresponding  
4 Event Data.”<sup>25</sup>

5           50. The Business Tools Terms define “Event Data” as, *inter alia*,  
6 “information that you share about people and the actions that they take on your  
7 websites and apps or in your shops, such as visits to your sites, installations of your  
8 apps, and purchases of your products.”<sup>26</sup>

9           51. Website operators use the Meta Pixel to send information about visitors  
10 to their Websites to Meta. Every transmission to Meta accomplished through the Meta  
11 Pixel includes at least two elements: (1) the website visitor’s FID and (2) the webpage’s  
12 URL triggering the transmission.

13           52. Depending on the configuration of the Meta Pixel, the website may also  
14 send Event Data to Meta. Defendant have configured the Meta Pixel on its Website to  
15 send Event Data to Meta.

---

16  
17  
18  
19 <sup>25</sup> *Id.*

20 <sup>26</sup> *Id.*

1           53. When website operators make transmissions to Meta through the Meta  
2 Pixel, none of the following categories of information are hashed or encrypted: the  
3 visitor's FID, the website URL, or the Event Data.

4           54. Every website operator installing the Meta Pixel must agree to the Meta  
5 Business Tools Terms.<sup>27</sup>

6           55. Moreover, the Meta Pixel can follow a consumer to different websites and  
7 across the Internet even after the consumer's browser history has been cleared.

8           56. Meta has used the Meta Pixel to amass a vast digital database of dossiers  
9 comprised of highly detailed personally identifying information about each of its  
10 billions of users worldwide, including information about all of its users' interactions  
11 with any of the millions of websites across the Internet on which the Meta Pixel is  
12 installed. Meta then monetizes this Orwellian database by selling advertisers the ability  
13 to serve highly targeted advertisements to the persons whose personal information is  
14 contained within it.

15           57. Simply put, if a company chooses to install the Meta Pixel on its website,  
16 both the company who installed it and Meta (the recipient of the information it  
17  
18  
19

---

20 <sup>27</sup> *See id.*

1 transmits) are then able to “track [] the people and type of actions they take,”<sup>28</sup>  
 2 including, as relevant here, the specific prerecorded video material that they purchase  
 3 from Defendant’s website.

4 **B. Defendant Knowingly Uses the Meta Pixel to Transmit the Private**  
 5 **Video Information of its Customers to Meta**

6 58. Defendant sells various prerecorded video materials on its Website,  
 7 [www.nationalnotary.org](http://www.nationalnotary.org), including online courses and certification programs on  
 8 various topics, including becoming a licensed notary or signing agent.

9 59. To purchase prerecorded video material from both Defendant’s Website,  
 10 a person must provide at least his or her name, email address, billing address, and credit  
 11 or debit card (or other form of payment) information.

12 60. During the purchase process on Defendant’s Website, Defendant uses –  
 13 and has used at all times relevant hereto – the Meta Pixel to disclose to Meta the  
 14 unencrypted FID of the person who made the purchase and the specific title of video  
 15 material that the person purchased (as well as the URL where such video material is  
 16 available for purchase).

---

18 <sup>28</sup> Meta, “Retargeting: How to Advertise to Existing Customers with Ads on  
 19 Facebook,” available at  
 20 [https://www.facebook.com/business/goals/retargeting?checkpoint\\_src=any](https://www.facebook.com/business/goals/retargeting?checkpoint_src=any).

1           61. In order to take advantage of the targeted advertising and other  
2 informational and analytical services offered by Meta, Defendant intentionally  
3 programmed its Website (by following step-by-step instructions from Meta’s website)  
4 to include the Meta Pixel code, which systematically transmits to Meta the FID of each  
5 person with a Meta account who purchases prerecorded video material on Defendant’s  
6 Website, along with the specific title of the prerecorded video material that the person  
7 purchased.

8           62. With only a person’s FID and the title of the prerecorded video material  
9 (or URL where such material is available for purchase) that the person purchased from  
10 Defendant’s Website—all of which Defendant knowingly and systematically provides  
11 to Meta—any ordinary person could learn the identity of the person to whom the FID  
12 corresponds and the subscription or the title of the specific prerecorded video material  
13 that the person purchased (and thus requested and obtained). This can be accomplished  
14 simply by accessing the URL [www.facebook.com/](http://www.facebook.com/) and inserting the person’s FID.

15           63. Defendant’s practice of disclosing the Private Video Information of its  
16 customers to Meta continued unabated for the duration of the two-year period  
17 preceding the filing of this action. At all times relevant hereto, whenever Plaintiff or  
18 any other person purchased prerecorded video material from Defendant on its Website,  
19 Defendant disclosed to Meta (*inter alia*) the specific title of the video material that was  
20 requested or obtained (including the URL where such material is available for

1 purchase), along with the FID of the person who requested or obtained it (which, as  
2 discussed above, uniquely identified the person).

3 64. At all times relevant hereto, Defendant knew the Meta Pixel was  
4 disclosing its customers' Private Video Information to Meta.

5 65. Although Defendant could easily have programmed its Website so that  
6 none of its customers' Private Video Information is disclosed to Meta, Defendant  
7 instead chose to program its Website so that all of its customers' Private Video  
8 Information is disclosed to Meta.

9 66. Before transmitting its customers' Private Video Information to Meta,  
10 Defendant failed to notify any of them that it would do so, and none of them have ever  
11 consented (in writing or otherwise) to these practices.

12 67. By intentionally disclosing to Meta Plaintiff's and their other customers'  
13 FIDs together with the specific title of the prerecorded video material that they each  
14 purchased, without any of their consent to these practices, Defendant knowingly  
15 violated the VPPA on an enormous scale.

16 **CLASS ACTION ALLEGATIONS**

17 68. Plaintiff seeks to represent a class defined as all persons in the United  
18 States who, during the two years preceding the filing of this action, purchased  
19 prerecorded video material or services from Defendant's Website while maintaining  
20 an account with Meta Platforms, Inc. f/k/a Facebook, Inc.

1           69. Class members are so numerous that their individual joinder herein is  
2 impracticable. On information and belief, members of the Class number in at least the  
3 tens of thousands. The precise number of Class members and their identities are  
4 unknown to Plaintiff at this time but may be determined through discovery. Class  
5 members may be notified of the pendency of this action by mail and/or publication  
6 through the Defendant's membership records.

7           70. Common questions of law and fact exist for all Class members and  
8 predominate over questions affecting only individual class members. Common legal  
9 and factual questions include but are not limited to (a) whether Defendant embedded  
10 Meta Pixel on its Website that monitors and tracks actions taken by visitors to its  
11 Website; (b) whether Defendant reports the actions and information of visitors to Meta;  
12 (c) whether Defendant knowingly disclosed Plaintiff's and Class members' Private  
13 Video Information to Meta; (d) whether Defendant's conduct violates the Video  
14 Privacy Protection Act, 18 U.S.C. § 2710; and (e) whether Plaintiff and Class members  
15 are entitled to a statutory damage award of \$2,500, as provided by the VPPA.

16           71. The named Plaintiff's claims are typical of the claims of the Class in that  
17 the Defendant's conduct toward the putative class is the same. That is, Defendant  
18 embedded the Meta Pixel on its Website to monitor and track actions taken by  
19 consumers on its Website and report this to Meta. Further, the named Plaintiff and the  
20 Class members suffered invasions of their statutorily protected right to privacy (as  
21

1 afforded by the VPPA), as well as intrusions upon their private affairs and concerns  
2 that would be highly offensive to a reasonable person, as a result of Defendant's  
3 uniform and wrongful conduct in intentionally disclosing their Private Purchase  
4 Information to Meta.

5 72. Plaintiff is an adequate representative of the Class because she is  
6 interested in the litigation; her interests do not conflict with those of the Class members  
7 she seeks to represent; she has retained competent counsel experienced in prosecuting  
8 class actions; and she intends to prosecute this action vigorously. Plaintiff and her  
9 counsel will fairly and adequately protect the interests of all Class members.

10 73. The class mechanism is superior to other available means for the fair and  
11 efficient adjudication of Class members' claims. Each individual Class member may  
12 lack the resources to undergo the burden and expense of individual prosecution of the  
13 complex and extensive litigation necessary to establish Defendant's liability.  
14 Individualized litigation increases the delay and expense to all parties and multiplies  
15 the burden on the judicial system presented by this case's complex legal and factual  
16 issues. Individualized litigation also presents a potential for inconsistent or  
17 contradictory judgments. In contrast, the class action device presents far fewer  
18 management difficulties and provides the benefits of single adjudication of the  
19 common questions of law and fact, economy of scale, and comprehensive supervision  
20 by a single court on the issue of Defendant's liability. Class treatment of the liability

1 issues will ensure that all claims and claimants are before this Court for consistent  
2 adjudication of the liability issues.

3 **CAUSE OF ACTION**  
4 **Violation of the Video Privacy Protection Act, 18 U.S.C. § 2710**

5 74. Plaintiff repeats the allegations asserted in the preceding paragraphs as if  
6 fully set forth herein.

7 75. The VPPA prohibits a “video tape service provider” from knowingly  
8 disclosing “personally identifying information” concerning any “consumer” to a third  
9 party without the “informed, written consent (including through an electronic means  
10 using the Internet) of the consumer.” 18 U.S.C. § 2710.

11 76. As defined in 18 U.S.C. § 2710(a)(4), a “video tape service provider” is  
12 “any person, engaged in the business, in or affecting interstate or foreign commerce,  
13 of rental, sale, or delivery of prerecorded video cassette tapes or similar audiovisual  
14 materials[.]” Defendant are each a “video tape service provider” as defined in 18  
15 U.S.C. § 2710(a)(4) because they engaged in the business of selling and delivering  
16 prerecorded video materials, similar to prerecorded video cassette tapes, to consumers  
17 nationwide.

18 77. As defined in 18 U.S.C. § 2710(a)(1), a “‘consumer’ means any renter,  
19 purchaser, or consumer of goods or services from a video tape service provider.” As  
20 alleged above, Plaintiff and Class members are each a “consumer” within the meaning

1 of the VPPA because they each purchased prerecorded video material or services from  
2 Defendant's Website that were sold and delivered to them by Defendant.

3 78. As defined in 18 U.S.C. § 2710(a)(3), "'personally identifiable  
4 information' includes information which identifies a person as having requested or  
5 obtained specific video materials or services from a video tape service provider." The  
6 Private Video Information that Defendant transmitted to Meta constitutes "personally  
7 identifiable information" as defined in 18 U.S.C. § 2710(a)(3) because it identified  
8 Plaintiff and Class members to Meta as an individual who "requested or obtained,"  
9 specific prerecorded video material from Defendant's Website.

10 79. Defendant knowingly disclosed Plaintiff's and Class members' Private  
11 Video Information to Meta via the Meta Pixel technology because Defendant  
12 intentionally installed and programmed the Meta Pixel code on its Website, knowing  
13 that such code would transmit the prerecorded video material requested or obtained by  
14 their consumers and the consumers' unique identifiers (including FIDs).

15 80. Defendant failed to obtain informed written consent from Plaintiff or  
16 Class members authorizing Defendant to disclose their Private Video Information to  
17 Meta or any other third party. More specifically, at no time prior to or during the  
18 applicable statutory period did Defendant obtain from any person who requested or  
19 obtained prerecorded video material or services on Defendant's Website (including  
20 Plaintiff or Class members) informed, written consent that was given in a form distinct

1 and separate from any form setting forth other legal or financial obligations of the  
2 consumer, that was given at the time the disclosure is sought or was given in advance  
3 for a set period of time, not to exceed two years or until consent is withdrawn by the  
4 consumer, whichever is sooner, or that was given after Defendant provided an  
5 opportunity, in a clear and conspicuous manner, for the consumer to withdraw consent  
6 on a case-by-case basis or to withdraw consent from ongoing disclosures, at the  
7 consumer's election. *See* 18 U.S.C. § 2710(b)(2).

8 81. By disclosing Plaintiff's and Class members' Private Video Information,  
9 Defendant violated their statutorily protected right to privacy in their Private Video  
10 Information.

11 82. Consequently, Defendant is liable to Plaintiff and Class members for  
12 damages in the statutorily set sum of \$2,500. 18 U.S.C. § 2710(c)(2)(A).

13 **PRAYER FOR RELIEF**

14 WHEREFORE, Plaintiff, individually and on behalf of all others similarly situated,  
15 seeks a judgment against Defendant as follows:

- 16 a) For an order certifying the Class under Rule 23 of the Federal Rules of  
17 Civil Procedure and naming Plaintiff as the representative of the Class  
18 and Plaintiff's attorneys as Class Counsel to represent the Class;  
19 b) For an order declaring that Defendant's conduct as described herein  
20 violated the VPPA;

- 1 c) For an order finding in favor of Plaintiff and the Class and against  
2 Defendant on all counts asserted herein;
- 3 d) For an award of \$2,500.00 to Plaintiff and each Class member, as  
4 provided by 18 U.S.C. § 2710(c);
- 5 e) For an order permanently enjoining Defendant from disclosing the  
6 Private Video Information of its subscribers to third parties in violation  
7 of the VPPA;
- 8 f) For prejudgment interest on all amounts awarded; and
- 9 g) For an order awarding punitive damages, reasonable attorneys' fees, and  
10 costs to counsel for Plaintiff and the Class under Rule 23 and 18 U.S.C.  
11 § 2710(c).
- 12
